TO WHOM SO EVER IT MAY CONCERN

We at DDF consultants strongly recommend the Finishing school program for young Professionals, it's impressive to see how Alternate Angle academy has designed this program to focus on the areas which provides a practical, implementable knowledge, which would mould the young professionals and their careers, market and industry ready.

I would endorse this program to everyone, who are looking to gain pragmatic knowledge base and give a jump start to their careers.

I have witnessed the change their programs make in the professional life of young Architects, and we at DDF would prefer to hire young professional who are trained at the finishing school.

Thanking You

Saurabh Chandra
